## Diagnostic Ultrasound System

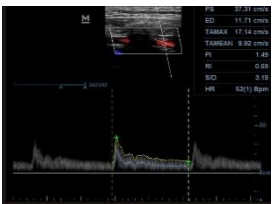

Triplex CCA with PW auto

Triplex CCA with PW auto

Triplex CCA with PW auto

Triplex CCA with PW auto

### System Highlights

- Exceptional Image Quality to enhance your diagnostic confidence
- Wide Range of transducers to meet the requirements of different application
- 4D capability with various rendering modes and iPage (multi slice imaging)
- Auto IMT (Intima-Media-Thickness) Measurements, to deliver a reliable carotid analysis
- TDI (Tissue Doppler Imaging) and Free Xros CM for comprehensive cardiac diagnosis
- One-Key automation function and extended measurement packages for an efficient diagnostic workflow iPower, iRoam, and full DICOM compatibility providing you with state of the art connectivity

### Transducers

- With a 192 high density elements lens, the L12-4 will meet your critical requirement for detail tissue information
- The L14-6 has a maximum frequency range from 6MHz, assuring you a fantastic image in both near and farfield
- With mindray's patent technologies, the mechanical 4D transducer will provide you with the best image quality in class

### Clinical Application

- Obgyn
- Nervous, Radiology
- Cardiology, ANesthesia
