

## SIARETRON 4000

INTENSIVE CARE  
VENTILATOR  
FOR ADULTS,  
CHILDREN  
AND NEWBORNS

TFT 15" COLOUR DISPLAY  
AVAILABLE ON DEMAND

DISPLAY 15" A COLORI  
DISPONIBILE A RICHIESTA

### SIARETRON 4000

The trolley version of SIARETRON 4000 incorporates a colour display TFT 12" revolving on the vertical axis.

The inspiratory and expiratory valve module is made in plastic material and can be removed or directed towards the right or left side of the patient.

As an optional, it is possible to add the inspired and expired CO<sub>2</sub> module.

The trolley includes a large cabinet for accessories with possibility to integrate a silent medical air compressor.

## SIARETRON 4000

### INTENSIVE CARE VENTILATOR FOR ADULTS, CHILDREN AND NEWBORNS

Hi-tech volume and pressure lung ventilator for intensive care with TFT 12" colour display.

The ventilator has a microprocessor control of all functions and it is suitable for adults, children and newborns by invasive intubation or face mask.

#### Ventilatory modes:

- Controlled volume VC/VAC
- Controlled volume for newborns and prematures VC/VAC BABY
- Controlled pressure APCV
- Guaranteed tidal volume in controlled pressure synchronized with patient breath APCV-TV
- Synchronized intermittent mandatory ventilation by pressure
- Assisted pressure PSV with apnoea back-up
- Assisted ventilation with pressure support with guaranteed tidal volume with apnoea back-up PSV-TV
- Non invasive ventilation NIV with leaks compensation
- BILEVEL, CPAP, APRV, adjustable drug nebulizer
- Pressure and inspiratory flow trigger with adjustable sensitivity
- Graphic and table trend of data
- Visualization of all patient data by wide dimensions curves (5 contemporaneously) and alphanumeric values
- Expiratory valve and flow sensor group easily interchangeable to facilitate the sterilization
- Predisposition for inspired and expired CO<sub>2</sub>
- Integrated battery system, 90 minutes autonomy
